

# IW8 IEEE Antennas and Propagation Society – Advancing Careers

## Abstract:

With the technological advances in wireless technology, this is a great time to be an antenna engineer, with expertise in antennas, propagation and electromagnetics. Core mission of IEEE Antennas and Propagation Society (AP-S) is to foster antennas, propagation and electromagnetics theory, technology, applications innovation and excellence for the benefit of humanity. Career is more than a job—it's a journey. AP-S provides the support and resources you need to thrive providing opportunities to share ideas at conferences, publish papers in leading journals, and develop leadership skills with volunteer opportunities. AP-S offers various opportunities to increase your technical skills offering various student paper/design contests, research grants as well as travel grants to attend various conferences. AP-S is bringing these opportunities to students and researchers providing opportunities to attend AP-S Sponsored conferences to present papers and exchange ideas along with opportunities for establishing and growing AP-S Chapters and Student Branch Chapters. Students can get involved with a student branch, network with peers and industry professionals, and gain experience that can help the first job.

### **Dr. C. J. Reddy**

2026 IEEE AP-S President

### **Prof. George Shaker**

Chair, IEEE AP-S Membership Benefits Committee

### **Prof. Qammer Abbasi**

Chair, IEEE AP-S Young Professionals Committee
